**Note:** Enter your User ID , click “Forgot Password” , and a new password will be sent to your registered email ID.

**Step 6:** After clicking on the Login button, user will be asked to enter the email id. On entering the email id click on the Submit button.

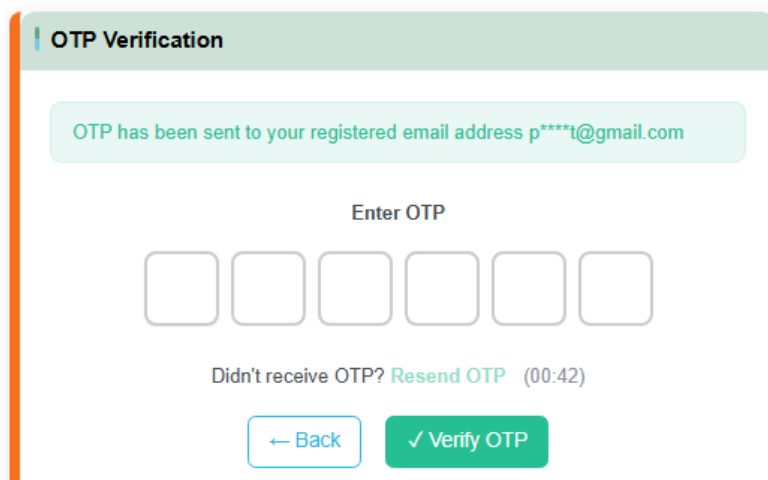

The image shows a modal dialog box titled "Update Email Address" with a close button (X) in the top right corner. Inside the dialog, there is a message: "Please enter your official email address to proceed." Below this message is a text input field with the placeholder text "Email Address". At the bottom center of the dialog is a green button labeled "Submit".

**Step 7:** After submitting the email id, Approval will be provided by Central Agency office. Once Approved, confirmation email will be send to your registered email id.

**Step 8:** After confirmation email is received User can login into the application using Login ID, password and entering the captcha code. Click on the login button and then you will receive an OTP in your email id. Enter the OTP, click on the Verify OTP button and user will get logged in.

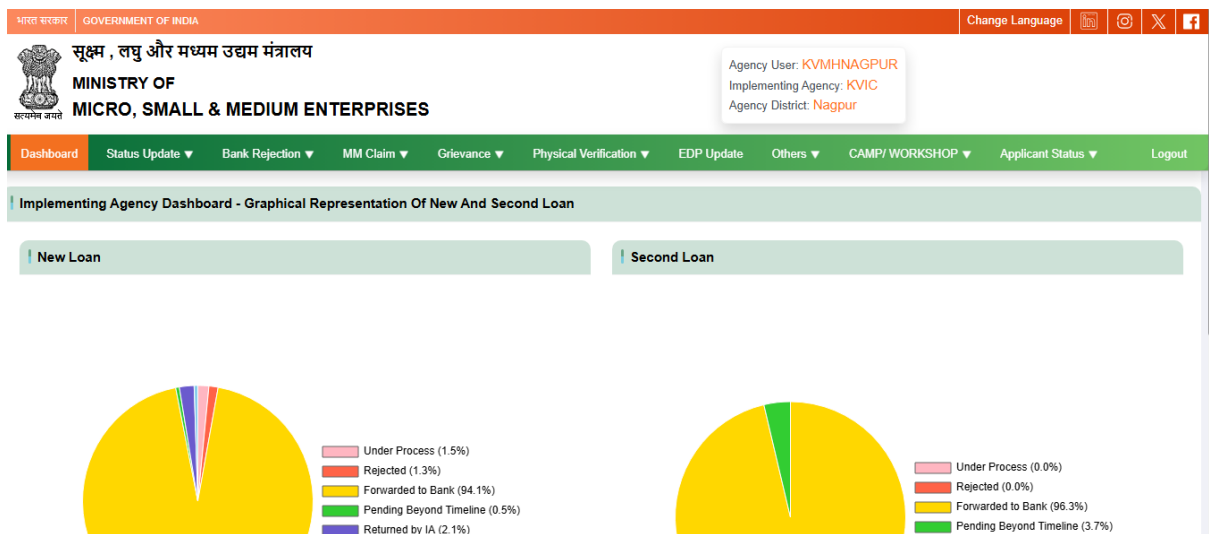

### Implementing Agency

The image shows a screen titled "OTP Verification". At the top, there is a green header bar with the text "OTP Verification". Below the header, there is a light green box containing the message: "OTP has been sent to your registered email address p\*\*\*\*t@gmail.com". Below this box, the text "Enter OTP" is displayed. Underneath "Enter OTP" are six empty square input boxes for entering the OTP digits. Below the input boxes, the text "Didn't receive OTP? Resend OTP (00:42)" is shown, with "Resend OTP" in green. At the bottom, there are two buttons: a blue button labeled "← Back" and a green button labeled "✓ Verify OTP".

## IA Login

**Step 9:** In case the user has forgotten the password click on the Forget password link, Enter the user name and click on the Forget password link. OTP will be send to the registered email id and on matching the OTP, the user will be asked for new password and confirm password. After successful update the user will be able to login into the application using the new password.
